

Pursuant to the Article 4 of the Ordinance on the Organisation and Management of the National Top-level Domain the .hr Domain Management Committee on the session held on April 18<sup>th</sup> 2016 has brought the following

## DECISION

For the purpose of improvement of the handling procedures of .hr domains and protection of the domain users, as well as authorised registrars and CARNet, the Committee finds necessary to warn the domain users of the importance of the correct provision of all user data on the domain, especially email addresses of the users that can be used for management of the domain, as well as for execution of irreversible actions.

Therefore, there has been decided as follows:

Registrars are obliged to warn the domain users through their websites and other means of communication of the following:

- The email address of the domain user stated in the Registry of .hr domains is used for managing the domain data, where besides the data modification, it is possible to request domain deletion and alteration of the domain user;
- The domain user is solely responsible for the accuracy of the stated email address and all activities performed using this address are considered valid.

Zagreb, April 18<sup>th</sup> 2016
